

A portable powerhouse, the HALO Bolt charger provides the juice when you need it most not only for your phone or tablet, but for your car, too! The one button starter can provide a jump to a car, boat, or lawn mower with the included jumper cables.

Plus, with two USB outputs, you can charge multiple devices at once, so you can power up your smartphone while your kids stay busy with their tablets. There's even a 12-volt AC outlet so you can charge your larger devices like laptops and plug in electric lamps for your stitching needs.

The HALO Bolt 58830 also features a convenient LED floodlight. Customers frequently rely on the Bolt as a power source during power outages to keep their electronic devices charged.

Traveling by air and want your Halo? No problem! You'll be happy to know all Halo Products are permitted as carry-on luggage.
